SUMMARY

Cloud DevOps Engineer specializing in **Azure, Terraform, automation, and platform engineering**, with experience supporting large-scale enterprise cloud transformations. Proficient in **Python and Java**, with a strong interest in **AI engineering and cloud-native AI**. Passionate about building scalable platforms, automating complex workflows, and exploring the convergence of **Cloud, DevOps, and AI**.

EDUCATION

Academy of Technology
B.Tech in Computer Science & Engineering • CGPA: 9.59
Aug 2019 – Jul 2023

Chandernagore Kanailal Vidyamandir
Class 12 Board: WBCHSE • Percentage: 84%
Jun 2019

SKILLS

- **Azure**
- **Terraform**
- **Powershell**
- **Python**
- **GitHub**
- **Docker**

EXPERIENCE

Tata Consultancy Services Kolkata
Systems Engineer Aug 2023 - Present
Cloud DevOps Engineer | Enterprise UK Retail Client

Cloud DevOps Engineer contributing to a **2-year enterprise Azure transformation**, supporting **250+ subscriptions** with a focus on cloud platform engineering, automation, observability, and security.

- Contributed to the migration of enterprise workloads from **on-premises and legacy cloud environments to Azure**, using **Terraform** to establish scalable, governed, and consistent infrastructure patterns.
- **Designed production ingress architecture handling ~15M transactions/week** using **Azure Front Door, Application Gateway, and API Management**, with standardized application and observability patterns.
- **Led end-to-end observability implementation** across the infrastructure estate, delivering Azure Workbooks and **200+ production alert types**, reducing manual monitoring effort by **~60%**.
- Built **Python/PowerShell automation** for self-service onboarding, WAF analysis, documentation, and Key Vault monitoring; reduced onboarding from **1–2 days to ~30 minutes**, supported **70+ applications**, monitored **1,000+ secrets/certificates**, and saved **~40 engineer-hours/month**.
- **Automated Azure WAF modernization across 160+ policies**, migrating CRS to DRS using **Python, PowerShell, and Terraform**, reducing false positives while maintaining production traffic continuity.

Persistent Systems Jan 2023 - Jun 2023
Software Engineer - Intern

- Developed a **full-stack web application** using **Java, Spring Boot, HTML, CSS, and JavaScript**, gaining hands-on experience in backend development, frontend integration, and web application architecture.
- Implemented backend services and integrated frontend components to deliver functional, maintainable web application features.

INTERESTS

- **Trekking**
- **Football**
